Magdeburg, Germany | Email: hamzauddin54@gmail.com | LinkedIn: [HamzaUddin](#) | Website: [Portfolio](#) | Contact: +4915566189843

Education:

Otto-von-Guericke-Universität (OVGU) (Germany)

(Mar 2024 – Aug 2026)

- MSc Operations Research & Business Analytics (CGPA 1.9)

University of Ljubljana (School of Economics & Business (Slovenia)

(Feb 2025 – June 2025)

- Erasmus+ Exchange Program, Courses: BI & Analytics, Sustainability and Quality in Supply Chains

Institute of Business Administration (IBA) (Pakistan)

(Aug 2016 – May 2020)

- BSc Accounting & Finance (CGPA 3.42/German 1.9)

Experience:

Bettermile (GLS eCom Lab) – User Insights & Support Analytics

(Dec 2024 – Now)

- Built 7+ standalone analytical dashboards, including driver feedback analysis across countries, multi-country mobile survey analytics, Intercom support case classification, app version quality tracking, and depot operations monitoring, using JavaScript, Chart.js, and Papa Parse to process thousands of records with real-time filtering and period-over-period comparisons.
- Developed Python automation scripts to process and clean raw CSV exports from third-party platforms (Intercom, Instabug, YouTube), eliminating manual data preparation and enabling continuous, repeatable analysis pipelines that replaced ad-hoc reporting intervals.
- Conducted correlation studies across multiple depot KPIs to uncover operational inefficiencies, translating findings into interactive visualizations that enabled data-driven decision-making at regional and depot levels.

US Mobile – Product Experience Specialist

(July 2023 – Feb 2024)

- Led the emails team to diagnose and resolve 40-45 daily client network issues via Front while engaging with 90-100 customers daily for troubleshooting, significantly improving system reliability and customer satisfaction.
- Reviewed 15 junior analysts' performance monthly via Klaus and conducted quality control checks on agent-customer interactions, ensuring consistent service quality and identifying improvement areas in alignment with KPIs.
- Managed 8-10 daily due diligence cases of potential payment misuse flagged by Stripe Radar, ensuring legal compliance during CC verification, and handled FCC escalations for regulatory adherence.

SWVL Pakistan PVT Limited

– Business Intelligence Specialist

(Feb 2021 – Aug 2021)

- Engineered real-time dashboards integrating Google BigQuery database and Sheets, providing the OPs team with data analysis capabilities for effective and financially informed day-to-day decision making and improving supply chain management.
- Achieved a 4% WoW reduction in vendor complaints by streamlining the invoices issue resolution process via Zendesk, while implementing controls to stabilize GMV movement and cap fluctuations to 5-7% WoW for consistent financial performance.
- Assisted the B2B team with the TaaS launch, ensuring strict financial compliance while closely monitoring accounts payable and proactively improving overall experience for transport partners.

– Treasury & Taxation Specialist

(Sept 2020 – Feb 2021)

- Managed relationships with external partners (primary bank, tax consultants) and internal stakeholders to ensure regulatory compliance, and standardized payroll with strict SOPs for timely disbursements and flawless tax compliance.
- Successfully optimized cash flow budget and forecasts, reducing financial runway from 4 weeks to 1 week through enhanced planning and monitoring processes.
- Spearheaded the company's inaugural external auditing and internal controls implementation, carefully crafting financial statements that laid the groundwork for successful NASDAQ listing and ensured financial reporting credibility for the start-up.

Project:

Supply Chain Network Optimization – *Scientific Project*

(Oct 2025 - Jan 2026)

Built a MIP model in Python to optimize facility, carrier, and port assignments for 9,200+ orders in a microchip manufacturer's outbound network under capacity and service-level constraints. Introduced a 3-tier soft capacity penalty framework to resolve infeasibility, achieving optimality in 0.33 seconds and identifying \$171K in cost savings versus baseline.

Option Pricing Model – *Financial Engineering*

(March 2024 - July 2024)

Engineered an option pricing model in Python utilizing 5 years of stock data from Yahoo Finance to evaluate the assumptions of the EMH and the Black-Scholes Model, culminating in a comparative analysis with real-world option prices

Skills:

- **Programming:** SQL, Python, MATLAB, STATA, R
- **BI Tools:** Power BI, Looker Studio, AWS Quicksight
- **Ms office:** Ms Word, Ms Excel, Ms Powerpoint
- **ETL Platforms:** Google BigQuery
- **CRM Tools:** Sharepoint, Zendesk, Pipefy
- **Interpersonal:** Flexibility, Collaboration, Analytical Skills, Project Management, Communication Skills
- **Language skills:** English (C1), Deutsche (A1), Urdu
